Embedded Autonomy Peter B. Evans, 2012-01-12 In recent years, debate on the state's economic role has too often devolved into diatribes against intervention. Peter Evans questions such simplistic views, offering a new vision of why state involvement works in some cases and produces disasters in others. To illustrate, he looks at how state agencies, local entrepreneurs, and transnational corporations shaped the emergence of computer industries in Brazil, India, and Korea during the seventies and eighties. Evans starts with the idea that states vary in the way they are organized and tied to society. In some nations, like Zaire, the state is predatory, ruthlessly extracting and providing nothing of value in return. In others, like Korea, it is developmental, promoting industrial transformation. In still others, like Brazil and India, it is in between, sometimes helping, sometimes hindering. Evans's years of comparative research on the successes and failures of state involvement in the process of industrialization have here been crafted into a persuasive and entertaining work, which demonstrates that successful state action requires an understanding of its own limits, a realistic relationship to the global economy, and the combination of coherent internal organization and close links to society that Evans called embedded autonomy.

Making Natural Hoof Care Work for You Pete Ramey, 2003 Natural hoof care is now being recognized as the most important new direction in horse care. At the forefront of this artful science is Pete Ramey, experienced natural hoof care practitioner. Pete has written Making Natural Hoof Care Work for You for horse owners, vets, and, of course, hoof care providers, wanting straight talk and reliable information on how to cross-over into natural hoof care. Pete's book is written in an easygoing, maverick style, that will guide you with confidence away from the pitfalls of shoeing and into the heart of true

natural trimming, booting, and natural horsekeeping practices. Book jacket.

Mad in America Robert Whitaker, 2019-09-10 An updated edition of the classic history of schizophrenia in America, which gives voice to generations of patients who suffered through cures that only deepened their suffering and impaired their hope of recovery. Schizophrenics in the United States currently fare worse than patients in the world's poorest countries. In *Mad in America*, medical journalist Robert Whitaker argues that modern treatments for the severely mentally ill are just old medicine in new bottles, and that we as a society are deeply deluded about their efficacy. The widespread use of lobotomies in the 1920s and 1930s gave way in the 1950s to electroshock and a wave of new drugs. In what is perhaps Whitaker's most damning revelation, *Mad in America* examines how drug companies in the 1980s and 1990s skewed their studies to prove that new antipsychotic drugs were more effective than the old, while keeping patients in the dark about dangerous side effects. A haunting, deeply compassionate book -- updated with a new introduction and prologue bringing in the latest medical treatments and trends -- *Mad in America* raises important questions about our obligations to the mad, the meaning of insanity, and what we value most about the human mind.

Gun Control in the Third Reich Stephen P. Halbrook, 2013-11-01 Based on newly-discovered, secret documents from German archives, diaries and newspapers of the time, *Gun Control in the Third Reich* presents the definitive, yet hidden history of how the Nazi regime made use of gun control to disarm and repress its enemies and consolidate power. The countless books on the Third Reich and the Holocaust fail even to mention the laws restricting firearms ownership, which rendered political opponents and Jews defenseless. A skeptic could surmise that a better-armed populace might have made no difference, but the National Socialist regime certainly did not think so—it ruthlessly suppressed firearm ownership by disfavored groups. *Gun Control in the Third Reich* spans the two decades from the birth of the Weimar Republic in 1918 through Kristallnacht in 1938. The book then presents a panorama of pertinent events during World War II regarding the effects of the disarming policies. And even though in the occupied countries the Nazis decreed the death penalty for possession of a firearm, there developed instances of heroic armed resistance by Jews, particularly the Warsaw ghetto uprising.

International Business Marios Katsioloudes, Spyros Hadjidakis, 2007-03-15 Traditionally, international business (IB) texts survey the field from a USA perspective, going on to compare the USA to the rest of the business world. This text addresses IB from a purely multinational perspective. International Business is examined from the USA angle, going on to address IB issues from other countries' perspectives, what we call the "Reverse Perspective." The authors interview business executives and politicians from a number of countries including the USA, Canada, Mexico, Brazil, Colombia, Argentina, India, Hong Kong, Taiwan, China, Japan, South Korea, Germany, Italy, and Russia. These interviews are incorporated at appropriate points in the text providing first-hand information and practical insight. Cases include: Air Arabia, Gap, Diebold Inc,

Matsushita, AMSUPP, NIKE, China Eastern Airlines, Luton & Dunstable Hospital, Harley Davidson, Cassis de Dijon, Green investments in Belize, Chicago Food and Beverage Company, Advanced Software Analytics

Autocross to Win (DG's Autocross Secrets) Dennis Grant,2017-06-04 Dennis Grant, the Street Modified Godfather, built an SCCA ProSolo Championship and FIA Canadian National Championship winning autocross car. This book describes the tricks, secrets, and engineering details he learned during his racing career. Equally applicable to road racers, rally cars, circle track cars, and high performance street cars, this book is full of information on how to make cars handle at the extreme limits of performance. Includes chapters on tuning suspensions, building shocks, and selecting tires - and much, much more! Whether you are just starting out building a high-performance car, or a grizzled veteran of motorsports, this book is full of insightful (and occasionally funny) observations on what it takes to tune the car and driver system in order to win races. Contains theory and practical advice as well. Written very much in the idiom of the legendary Carroll Smith's ...to Win series, this book is an essential addition to the bookshelf of any automotive enthusiast.

Woody and Maggie Walk Across America Bernie Harberts,2022-09-12 Woody and Maggie Walk Across America is the true story of Bernie Harberts' 3,500-mile journey across America with his mule and pony. The 38-page, full-color children's book is written for 5 to 10-year-old readers. Join Bernie, Woody and Maggie to learn: What Bernie found unusual about each state (example: saguaro cactus in Arizona) What Woody and Maggie imagined about each state (example: naked green giants that have lost their boots!) How the three lived from day to day Exercises at the end of the book help young readers find their way across America by teaching them state shapes, locations and characteristics. A must-read for any child or grown-up child that enjoys reading about horses, mules, donkeys, Long Rides, travel, adventure and geography.

Handbook of Research in Education Finance and Policy Helen F. Ladd, Margaret E. Goertz,2014-12-17 Sponsored by the Association for Education Finance and Policy (AEFP), the second edition of this groundbreaking handbook assembles in one place the existing research-based knowledge in education finance and policy, with particular attention to elementary and secondary education. Chapters from the first edition have been fully updated and revised to reflect current developments,

new policies, and recent research. With new chapters on teacher evaluation, alternatives to traditional public schooling, and cost-benefit analysis, this volume provides a readily available current resource for anyone involved in education finance and policy. The Handbook of Research in Education Finance and Policy traces the evolution of the field from its initial focus on school inputs and revenue sources used to finance these inputs, to a focus on educational outcomes and the larger policies used to achieve them. Chapters show how decision making in school finance inevitably interacts with decisions about governance, accountability, equity, privatization, and other areas of education policy. Because a full understanding of important contemporary issues requires inputs from a variety of perspectives, the Handbook draws on contributors from a number of disciplines. Although many of the chapters cover complex, state-of-the-art empirical research, the authors explain key concepts in language that non-specialists can understand. This comprehensive, balanced, and accessible resource provides a wealth of factual information, data, and wisdom to help educators improve the quality of education in the United States.

Handbook of Neurofeedback James R. Evans, 2007-08-17 Handbook of Neurofeedback is a comprehensive introduction to this rapidly growing field, offering practical information on the history of neurofeedback, theoretical concerns, and applications for a variety of disorders encountered by clinicians. Disorders covered include ADHD, depression, autism, aging, and traumatic brain injury. Using case studies and a minimum of technical language, the field's pioneers and most experienced practitioners discuss emerging topics, general and specific treatment procedures, training approaches, and theories on the efficacy of neurofeedback. The book includes comments on the future of the field from an inventor of neurofeedback equipment and a discussion on the theory of why neurofeedback training results in the alleviation of symptoms in a wide range of disorders. The contributors review of procedures and a look at emerging approaches, including coherence/phase training, inter-hemispheric training, and the combination of neurofeedback and computerized cognitive training. Topics discussed include: Implications of network models for neurofeedback The transition from structural to functional models Client and therapist variables Treatment-specific variables Tomographic neurofeedback Applying audio-visual entrainment to neurofeedback Common patterns of coherence deviation EEG patterns and the elderly Nutrition and cognitive health ADHD definitions and treatment Attention disorders Autism disorders The neurobiology of depression QEEG-guided neurofeedback This book is an essential professional resource for anyone practicing, or interested in practicing neurofeedback, including neurotherapists, neuropsychologists, professional counselors, neurologists, neuroscientists, clinical p

How Effective is European Merger Control? Tomaso Duso, Klaus Peter Gugler, B. Burcin Yurtoglu, 2008 This paper applies a novel and intuitive approach based on stock market data to a unique dataset of large concentrations during the period 1990-2002 to assess the effectiveness of European merger control. We analyze the economic effects of the European

Commission's merger control decisions and distinguish between prohibitions, clearances with commitments (either behavioral or structural), and outright clearances. We run an event study on merging and rival firms' stock prices to quantify the profitability effects of mergers and merger control decisions. The basic idea is to relate announcement and decision abnormal returns: merger control is effective if anticompetitive rents observed around the merger announcement are reversed by the antitrust decision, i.e. if there is a negative relation between announcement and decision abnormal returns. Our findings suggest that only outright prohibitions completely solve the competitive problems generated by the merger. Remedies are on average not effective in solving anticompetitive concerns, yet, we can qualify this finding. Remedies are more effective when they are applied during the first rather than the second investigation phase. Moreover, the European Commission appears to learn over time, since remedies are on average more effective in industries where they have been intensively applied before.

Robust Multimodal Cognitive Load Measurement Fang Chen, Jianlong Zhou, Yang Wang, Kun Yu, Syed Z. Arshad, Ahmad Khawaji, Dan Conway, 2016-06-14 This book explores robust multimodal cognitive load measurement with physiological and behavioural modalities, which involve the eye, Galvanic Skin Response, speech, language, pen input, mouse movement and multimodality fusions. Factors including stress, trust, and environmental factors such as illumination are discussed regarding their implications for cognitive load measurement. Furthermore, dynamic workload adjustment and real-time cognitive load measurement with data streaming are presented in order to make cognitive load measurement accessible by more widespread applications and users. Finally, application examples are reviewed demonstrating the feasibility of multimodal cognitive load measurement in practical applications. This is the first book of its kind to systematically introduce various computational methods for automatic and real-time cognitive load measurement and by doing so moves the practical application of cognitive load measurement from the domain of the computer scientist and psychologist to more general end-users, ready for widespread implementation. Robust Multimodal Cognitive Load Measurement is intended for researchers and practitioners involved with cognitive load studies and communities within the computer, cognitive, and social sciences. The book will especially benefit researchers in areas like behaviour analysis, social analytics, human-computer interaction (HCI), intelligent information processing, and decision support systems.

Improving Student Learning Herbert J. Walberg, 2010-12-01 *Improving Schools to Promote Learning* is a concise and common-sense examination of all the moving parts that drive student learning. The book ties together the research, policies, and practices relative to the state, district, school, classroom, and family, and explains their effects on student learning. The author covers an array of topics, including technology, charter schools, turnaround initiatives, and instruction in specific subject areas. Herbert J. Walberg's book continues the work of previous publications from the Center on Innovation &

Improvement (Handbook on Restructuring and Substantial School Improvement and Handbook on the Statewide Systems of Support) that connect research to practice at various levels of the education system. The book is accessible to a wide audience, including educators, school board members, parents, and policy makers. Walberg includes action steps in every chapter, providing practical recommendations for improved student achievement. The author also offers select references for additional material on the best research and most effective practices.
